**SUNSTREAM**

## RC401 - Remote Pairing Instructions

Your Remote control unit should be labeled with 'RC401' on the bottom left side of the unit. \*Note: Your Sunstream Product comes with 2 paired remotes\*

**How To Pair Transmitters-** Press and release the Red 'Program' button once so the 'Add Transmitter' light flashes, then press 'Up' on the transmitter three (3) times. If you do not succeed, repeat the process - slowly tap the the 'up' button on the transmitter. Up to 8 remotes can be paired.

**Clear Memory-** Select the red program button for 15 seconds.

**Depressurize Lines:** This feature depressurizes the hydraulics on SunLift models for hose removal. Press program three (3) times to scroll to 'depressurize' Then, Press 'Up' then 'Dn' on the keypad or the transmitter key FOB.
